Planning for Student Learning:

Effective Curriculum, Unit, and Lesson Design

Learn guiding principles for designing standards-based curriculum, units, and lessons focused on developing learners' language performance. Consider how the National Standards, 21st Century Skills, and Common Core guide the development of a vertically aligned curriculum that builds students' communication skills and cultural understandings. Participants explore thematic unit design and daily lesson planning with strategies that maximize student learning in support of curricular goals, with indicators of performance expected at each level of instruction.
